DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-13, drawn to a method for determining whether a peptide forms a phosphorus-based ester.

Group II, claim(s) 14, 15-19, drawn to a peptide which forms a phosphorus-based ester with an organophosphorus agent.

Group III, claim(s) 21, drawn to a peptide library.

Group IV, claim(s) 28, 30, drawn to a composition of matter.

Group V, claim(s) 31, 34, drawn to an article of manufacture.

Group VI, claim(s) 35, drawn to a method for reducing the likelihood of injury due to exposure to an agent.

Group VII, claim(s) 36, drawn to a method for decontaminating an area exposed to an agent.

The inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature in all groups is a peptide which forms a phosphorus-based ester with an organophosphorus agent. This

Art Unit: 1655

element cannot be a special technical feature under PCT Rule 13.2 because the element is shown in the prior art. Cho et al. (Applied and Environmental Microbiology 2002;68(4):2026-2030) teaches an organophosphorus hydrolase that forms a phosphorus-based ester with an organophosphorus agent. Thus, there is no special technical feature, and the application lacks unity of invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
